In the great cities people attend to their own business. They pass and repass, scarcely speaking and in the main not knowing each other. But in the small towns and villages the reverse of this is true. There is a zealous prying into and knowledge had of everybody's business-each more intent upon the affairs of others than his own. Men ait in clusters and tattle. Women sit together and tattle. A story is started. It is repeated with liberal additions and grows to be a monstrous thing-a wonderful thing that the prince of liars would be proud of.
